<b>Price</b>	£7.99

- Includes 8 pages of stickers

This book offers activities to approach the world of numbers in an engaging and motivating way and to foster a positive attitude towards mathematics. The characteristic setting and the guiding characters that accompany the children create a positive involvement. Each chapter is introduced by a short story, which allows to link the mathematical exercises to a "reality", albeit imagined. In addition, the narrative approach stimulates children's curiosity. The various topics are always presented in a gradual and intuitive way. Ages: 6 plus

**Tecnoscienza** is a group of authors and educators who, for the last 15 years, have worked to disseminate knowledge about science, technology, math, and the environment for numerous organisations, such as museums and businesses. They've published several titles, translated worldwide. **Agnese Baruzzi** was born in 1980 and graduated in Graphic Design. She has worked as an illustrator and author since 2001. Her books that have been published several countries of the world.
