<b>Size</b>	225 mm x 225 mm
<b>Pages</b>	120 Pages
<b>Illustrations</b>	102 color
<b>Price</b>	£24.95

- Constructed Bouquets presents a collection of 60 bouquets with a structural element

As in many things, a well-thought out base structure is a necessity to arrive at a good end result. The same goes for constructions and structures used in floral art. A construction, whether it's made from natural or artificial materials, helps surpass the boundaries of what is technically achievable. It can be used to give a creation a three dimensional or architectural shape, can add to or break down symmetry, help explore creative possibilities or simply act as a supplemental decorative touch. Masterflorists Stefan Göttele (DE), Frédéric Dupré (FR), Patrick Jansen (NL) and Stijn Simaëys (BE) show how it can be done with flair, fun, inventiveness and elegance. *Constructed Bouquets* presents an inspirational collection of 60 exceptional bouquets with a structural element. Text in English and Dutch.
