- Original photography by a young artist; discover the world in a whole new way
- The photographs in this book, although taken of actual-size subjects, appear to be of miniature models
- Follows on from the success of the first three volumes Belgium, Antwerp, and New York

Photographer Jasper Léonard previously resized Antwerp and New York and now points his special tilt-shift lenses towards Amsterdam. **Amsterdam Resized** shows you the city like you've never seen it before: the famous canals of Amsterdam have been reduced to mere trickles with mini-sized bridges; the joggers in the Vondelpark now resemble Playmobil puppets, and the Stedelijk Museum now looks more like a bath tub. A new book in the Resized series, which has been a huge success in the US with articles in, among others, USA Today and the New York Post. International press has heaped praise on the Resized series: "The book is an intimate and magical token of admiration." — The Sydney Morning Herald Also available: Antwerp Resized ISBN: 9789401432702 Belgium Resized ISBN: 9789401434614 New York Resized ISBN: 9789401443395
