- Comprehensive world survey of the world's most challenging grape variety
- Extensively illustrated with maps and photos in 4-color
- Shortlisted for the André Simon wine book award

Winemakers all over the world have set out in search of the Holy Grail: to repeat Burgundy's success with Pinot Noir. ***In Search of Pinot Noir*** investigates the changing character of Burgundy, asks what happens to Pinot Noir outside of Burgundy, and examines how the wines of each region age. How far are styles of Pinot Noir inside and outside of Burgundy due to terroir and how far are they influenced by winemaking? Extensive tasting notes address these issues and complement discussion of the regions where Pinot Noir is grown. Is Pinot Noir uniquely successful in Burgundy or have other regions in Europe or the New World succeeded in their challenge? Can Pinot Noir really achieve its full complexity only on limestone soils, or does it produce equally interesting expressions in other terroirs? Is there only one true path for Pinot Noir or have plantings in new places revealed alternative truths for this fascinating grape? What is the ultimate Pinot Noir?

Pinot Noir is a uniquely challenging grape with an unrivalled ability to reflect the character of the site where it grows. *In Search of Pinot Noir* is a world wide survey of everywhere Pinot Noir is grown, extending from Burgundy to the New World .
