- Book accompanying the exhibition at the HfG Archiv Ulm (15 Feb–26 Oct 2025)
- Exhibits on the architecture department of the HfG Ulm published for the first time

This book traces the legacy of the Department Building at the Ulm School of Design, where experimentation and intellectual rigor redefined modern architecture. Rooted in critical thinking and knowledge exchange, it brought together design, science, and creativity to address architecture’s complex challenges.

*“Today, the open spirit of Ulm feels more urgent than ever, reshaping how we inhabit and imagine the future of our data-driven world!”* – Georg Vrachliotis, Head of the Architecture Department, TU Delft
